

Executive Director's Message

2017 was full of accomplishments at CamTran. We were integral in the community participating in local parades, resource fairs and community outreach initiatives. Additionally, CamTran continued to provide needed transportation services throughout Cambria County resulting in over 1 million passenger trips. Customers used our services to get to doctor's appointments, shopping and a local Produce to People event among many other purposes.

As we look to the future, welcoming new compressed natural gas (CNG) buses will be the focus of our efforts along with a variety of projects including the rehabilitation of the historic Johnstown Inclined Plane, Ebensburg Facility renovation and the addition of solar panels to our Woodvale Facility.

It is an exciting time in public transportation in Cambria County and the sky truly is the limit as we continue to offer a variety of mobility choices!

Rose H. Jucay-Noll
Executive Director

CamTran Never Stops: Highlights from FY 2016-2017

Christmas Over the City Event at the Johnstown Inclined Plane a Success

This past Christmas season, the Inclined Plane hosted its annual Christmas Over the City event hosting children and their families from far and wide.

Complete with free photos with Santa as well as free gift bags for the children who attended, the event was a huge success.

Christmas Over the City provided families with the opportunity to continue a Johnstown tradition that has been benefitting the community for well over 20 years.

The Christmas Over the City event is one that people throughout Cambria County look forward to every year. The Gift Shop provides the perfect backdrop for making memories and allowing customers an opportunity to purchase Christmas gifts.

Technology in Transit

As we look to the future, technology continues to play a significant role at CamTran. Through social media platforms like Facebook and Twitter, Where's my Bus, Find my Ride and the CamTran app, technology will continue to enhance our riders' experiences and make using CamTran services more convenient and accessible resulting in a customer experience second to none.

CNG Public Fueling Station

On April 20, 2017, officials with the Pennsylvania Department of Transportation (PennDOT) and Cambria County Transit Authority (CamTran) celebrated the opening of the commonwealth's newest compressed natural gas (CNG) fueling station in Johnstown, Pennsylvania. The facility was the first of 29 new CNG stations Love's Trillium CNG will design, build and maintain for numerous transit authorities in Pennsylvania. This is part of a public-private partnership (P-3) contract PennDOT awarded to the company in 2016. The P-3 project will provide CNG to more than 1,600 buses at transit agencies across Pennsylvania, including 22 at the CamTran location. CamTran currently has 7 CNG buses and has 15 more that have been ordered.

PennDOT Deputy Secretary for Multimodal Transportation, Toby Fauver, addresses attendees at the public CNG fueling station grand opening.

CamTran Jumps on the Bus as Part of Hockeyville

This year, CamTran sponsored a vinyl bus overlay that covers the press box at the 1st Summit Arena at Cambria County War Memorial in the spirit of Johnstown's recent nationally recognized Hockeyville title sponsored by Kraft-Heinz.

The design of the bus reflects CamTran's

progressive objective of the growing of new CNG buses into its fleet.

Enlisting the help of the local business Absolute Signs, CamTran is now able to show its support for the Johnstown Tomahawks hockey team, Special Olympics, as well as any other events held at the arena.

Johnstown Inclined Plane Celebrates 126th Anniversary

In June 2017, the Johnstown Inclined Plane celebrated its 126th anniversary. The milestone was celebrated with a party which included a variety of activities for families to participate in.

Children were able to ride the historic Inclined Plane free with a paying adult. Also, there were Gift Shop specials and the Ice Cream Shop offered those in attendance a chance to cool down with a sweet treat.

CamTran Provides the Link Between Families and Food

On the first Wednesday of every month, the Pittsburgh Food Bank works with a local agency to provide the Produce to People initiative held at the Johnstown Vo-Tech. CamTran does its part by being the link between families and the event by offering shared ride and fixed route bus service to the event.

People who attend Produce for People receive between 30-40 pounds of fresh produce and food in an effort to get food to those in need.

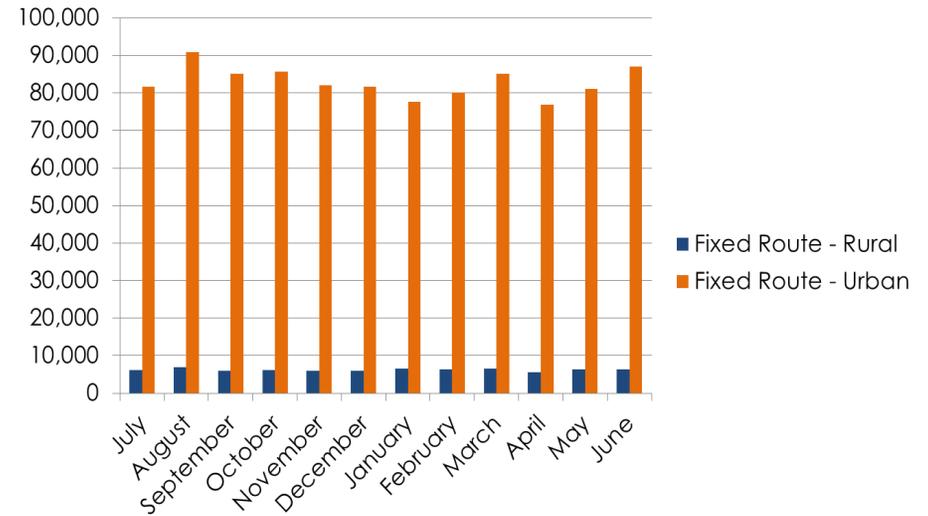

Safety is the top priority at the Johnstown Incline Plane

On April 30, a rescue and safety exercise was conducted at the Johnstown Incline Plane. This exercise included participation from West Hills Fire Department, East Taylor Fire Department, Johnstown Fire Department and members of CamTran and Incline Plane Staff. These trainings and exercises are done on an annual basis at the Incline Plane and prove invaluable. Local fire departments become familiar with our operation, and employees are educated on how to respond in the event of a major incident or accident.

2017 in Review

Fiscal year 2016-2017 brought about many positive changes for CamTran. Not only has CamTran been a force in promoting public transit for Cambria County through technological advancements and innovation, it has shown its dedication to the ongoing improvement of the Johnstown area by engaging in various community events while cultivating a sense of pride in the area.

FY 2017-2018 Will Bring:

- * Johnstown Inclined Plane Rehabilitation Project
- * Ebensburg Office Renovation
- * Installation of Solar Panels at the Woodvale Office
