

myStop Mobile

Navigation

We are encouraging everyone to use our convenient mobile app myStop. It's simple to download, easy to use, and can be accessed during times the administrative office is closed.

1. In your App store, search myStop.
2. Allow location while using the App.
3. Select CamTran

You're all set!

You can then "favorite" the routes you use on regular basis by highlighting the star or you can plan your trip. Just enter the location you are starting from and where you are going to.

From there, you will see how to get there and which route/s to take, the time the bus will be there, and how long it will take you to get there. It will also indicate service alerts, if the bus is delayed, and what time it will arrive.

It's that simple! Any questions, please call our Customer Service, 814-535-5526. We'll be happy to assist you. Thank you for choosing Camtran.
